-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19, drawn to a device for transporting plants, classified in class 47, subclass 73.
- II. Claims 20-24, drawn to a method of enveloping and transporting a plant, classified in class 47, subclass 66.7.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process could be used with a product (device) that is a burlap bag on the root ball of tree that is placed in the front shovel of a tractor that soil in the shovel.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Upon election of Invention I, Applicant is further required under 35 USC 121 to election among the following patentably distinct species of the claimed invention:

Species A: - type of fibrous material - one of polyester, natural fibers, or human hair

Art Unit: 3643

Species B: - type of aquatic plant - one of water lily tuber, marginal plant cuttings, oxygenator stems, or bare root cuttings

Upon election of Invention II, Applicant is further required under 35 USC 121 to election among the following patentably distinct species of the claimed invention:

Species B: - type of aquatic plant - one of water lily tuber, marginal plant cuttings, oxygenator stems or bare root cuttings

Species C: - type of end use location - one of pond or water basin

Applicant is required under 35 U.S.C. 121 to elect for Invention I a single entry for each species (for example, natural fibers and water lily tuber) or for Invention II a single entry for each species (for example, bare root cuttings and pond) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, for Invention I, claims 1-3, and 9 appear generic; for Invention II claim 20 appear generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 3643

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
